Simago® time

Time recording & time management

Simago® time offers extensive functional and configuration options for professional time recording and time management.

Simago® time supports the administration of employee master data, time and payroll models as well as the evaluation of time bookings. With the Employee Self Service, employees can view balances and bookings or start workflows, e.g., for time off or business trips, at any time and from anywhere.

Simago® time includes all corresponding functionalities for the mapping of working times and accounting according to the Working Time Act, collective agreement or company/service agreement, e.g., according to Minimum Wage Act (Mindestlohngesetz, MiLoG), ArbZG, TVöD, AZV etc.

COMPLETE TIME RECORDING
FOR YOUR COMPANY

Simago®

The building blocks for your digital solution

Simago® is one of the most comprehensive browser-based solutions for access, time and security available in Germany.

Fully integrated in your working environment, Simago® offers state-of-the-art tools for digitizing and automating processes, whether you are at the workplace or remotely. **PERFORM DIGITAL**

- ✓ Workforce scheduling
- ✓ Workforce management
- ✓ Competence/qualification

There are also useful extras available

Dashboard/Virtual Terminal

The integrated dashboard provides employees with a quick overview of balances, postings and workflows. Working times are recorded directly at the workplace via the integrated virtual terminal.

Time Models/Absences

The day models and work schedules are used to easily and conveniently map working time regulations taking into account caps, time limits, core times, absences etc.

Time Account Editor

The Time Account Editor allows you to easily create time and payroll accounts, long-term accounts, summary accounts or counting accounts.

Operational Integration Management

With **Simago®** time, you can also use functions for logging and evaluating operational integration management.

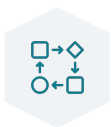

Competence Management

With **Simago®** time, you can manage the training, events and qualifications of your employees according to ISO 9001:2015.

Payroll Accounting

With **Simago®**, the calculated time and payroll accounts as well as absences are output as a printed list or transferred directly via standard interface to the payroll program, such as SAP, Datev or Lexware.

Workflows

In **Simago®** time, you can design workflows at any time to request vacations, business trips, time withdrawals or correction postings. The multi-stage approval processes are mapped for each application type individually.
